A. Introduction

The HR Applicant Process Window System is a desktop-based recruitment management application designed to streamline the hiring process for applicants and Human Resource personnel.

The system enables applicants to create accounts, complete profiles, submit job applications, upload requirements, and monitor their application status. Human Resource personnel can review applications, validate documents, conduct applicant screening, schedule interviews, evaluate candidates, and make hiring decisions.

The application uses a persistent database such as MySQL, SQL Server, or MS Access to securely store applicant information, job vacancies, interview records, and hiring decisions.

The system supports role-based access control to ensure that users can only access features appropriate to their assigned roles.

System Limitations

- The application is designed for Windows desktop environments only.
- Internet connectivity may be required depending on database configuration.
- Applicants can only edit applications before HR review begins.
- Closed job vacancies cannot accept new applications.
- Only authorized HR Managers or Administrators can approve final hiring decisions.

B. Objectives of the system

The HR Applicant Process Windows Application aims to provide an efficient and organized platform for managing the recruitment and hiring process. Specifically, the system seeks to:

1. Enable applicants to register accounts, manage their profiles, and apply for available job vacancies.

2. Allow applicants to submit and update required documents and monitor the status of their applications.
3. Provide HR personnel with tools to review, screen, and evaluate applicants throughout the recruitment process.
4. Facilitate interview scheduling, interview evaluation, and final hiring decisions.
5. Maintain accurate records of applicant information, application statuses, and recruitment activities.
6. Implement role-based access control to ensure that system functions are accessible only to authorized users.
7. Prevent duplicate applications and enforce recruitment business rules for a more reliable hiring process.
8. Generate recruitment-related reports to support HR monitoring and decision-making.
9. Improve the efficiency, accuracy, and transparency of the overall applicant processing and recruitment workflow.

C. General Information

C.1 SYSTEM OVERVIEW

The HR Applicant Process Window System contains the following major functionalities:

1. User Registration and Authentication
2. Applicant Profile Management
3. Job Vacancy Management
4. Application Submission and Tracking
5. Document Management
6. Screening and Evaluation
7. Interview Scheduling
8. Hiring Decision Management
9. Report Generation
10. User and Role Management

C.2 USER ACCESS MODULES

The system has three primary user types:

- Applicant
- HR Staff
- HR Manager/Admin

Each user type has specific permissions and responsibilities.

C.2.1 APPLICANT MODULES

Figure 1.1 Applicant Login

Applicants must register an account before accessing the system.

To log in:

1. Enter your registered email address.
2. Enter your password.
3. Click Login.

If the credentials are valid, the system redirects the user to the Applicant Dashboard.

Available options:

- Register New Account
- Forgot Password
- Exit System

Figure 1.2 Applicant Registration

The screenshot displays a web application window titled "Applicant Registration". The window is split into two main sections. On the left, there is a 3D architectural rendering of a modern, blue, pentagonal building with a glass roof, surrounded by a pool and greenery. The building has "PENTANODE NETWORK & SYSTEMS CO." written on its facade. On the right, there is a registration form. At the top of the form is the Pentanode logo, which consists of a blue pentagon with a white star inside. Below the logo, the text "Registration Form" is displayed, followed by "Sign in to start your session". The form contains several input fields: "First Name", "Last Name", "Address", "Contact Number", "Email", and "Password". The "Password" field has a toggle icon (an eye) to the right of it. At the bottom of the form, there are two buttons: "Register" and "Cancel".

New applicants must provide the following information:

- Full Name
- Email Address
- Contact Number
- Password
- Address

The system validates duplicate email addresses before creating an account.

After successful registration, applicants may proceed to login.

Figure 1.3 Applicant Dashboard

The Applicant Dashboard displays:

- Current Application Status
- Missing Documents
- Scheduled Interviews
- Recent Updates

Applicants can navigate to:

- My Profile
- Job Vacancies
- My Applications
- My Documents
- Application Status

Figure 1.4 My Profile

The image shows a screenshot of the 'ApplicantProfileForm'. It is divided into several sections: 'Personal Information' with fields for Full Name (shey mcin), Email (shey@gmail.com), Contact No. (09123), Address (1234), and Other important details; 'Education' with a field for Educational Attainment; 'Work Experiences' with a field for Enter work experiences; and 'PROFILE' with a placeholder for a profile picture and an 'Add/Change Picture' button. At the bottom, there are buttons for 'Save to profile', 'Change Password', 'Full Profile', and 'Back'.

Applicants can create and update their personal information.

Profile details include:

- Personal Information
- Address
- Contact Details
- Educational Background
- Skills
- Work Experience

Click **Save** to update profile information.

Applicants may edit profile information anytime.

Figure 1.5 Job Vacancies

Applicants can:

- View available job openings
- Search vacancies
- Filter vacancies by department or position
- View job qualifications
- Apply for a selected position

To apply:

1. Select a job vacancy.

2. Review job details.
3. Click **Apply**.

The system prevents duplicate applications for the same job.

Figure 1.6 My Applications

This page displays:

- Applied Position
- Date Submitted
- Current Status
- HR Remarks

Applicants can edit application details only when the application status is:

- Draft
- Submitted (before HR review begins)

Once HR starts reviewing the application, editing is disabled.

Figure 1.7 My Documents

Applicants can upload required documents, including:

- Resume
- Valid ID
- Transcript of Records
- Certificates

The system displays document status:

- Submitted
- Missing
- Pending Verification

Applicants may replace uploaded files before HR review starts.

Figure 1.8 Application Status Tracking

[Insert screenshot of Application Timeline]

Applicants can monitor their application progress through a timeline.

Visible information includes:

- Current Status
- Status History
- HR Remarks
- Interview Schedule
- Final Decision

C.2.2 HR STAFF MODULES

Figure 2.1 HR Login

[Insert screenshot of HR Login Form]

HR personnel must enter their credentials to access the system.

Access permissions depend on assigned roles.

Available roles:

- HR Staff
- HR Manager
- Administrator

Figure 2.2 HR Dashboard

[Insert screenshot of HR Dashboard]

The dashboard displays recruitment summaries such as:

- Total Applicants
- Pending Reviews
- Scheduled Interviews
- Accepted Applicants
- Rejected Applicants

Figure 2.3 Applicant List

[Insert screenshot of Applicant List]

HR Staff can:

- View applicant records
- Search applicants
- Filter by status
- Open applicant profiles
- Review submitted documents

Figure 2.4 Applicant Review

[Insert screenshot of Applicant Review Page]

During review, HR personnel can:

- View application details

- Validate submitted requirements
- Add remarks
- Lock applications for review

Once an application is locked, applicants can no longer edit submitted information.

Figure 2.5 Screening Module

[Insert screenshot of Screening Module]

HR Staff evaluates applicants based on qualifications.

Available actions:

- Mark as Qualified
- Mark as Not Qualified
- Add Screening Remarks

The system updates application status automatically.

Figure 2.6 Interview Scheduling

[Insert screenshot of Interview Scheduling Form]

HR Staff can schedule interviews by entering:

- Date
- Time
- Interviewer
- Mode (Online or On-site)
- Location

The system prevents scheduling interviews with past dates.

Applicants automatically receive interview updates.

Figure 2.7 Interview Evaluation

[Insert screenshot of Interview Evaluation Form]

HR Staff records interview results, including:

- Scores
- Remarks
- Pass or Fail Recommendation

Completed evaluations are stored in the database.

C.2.3 HR MANAGER/ADMIN MODULES

Figure 3.1 Job Vacancy Management

[Insert screenshot of Job Vacancy Management]

HR Managers and Administrators can:

- Add job vacancies
- Edit vacancies
- Close vacancies
- Reopen vacancies

Each job vacancy contains:

- Position Title
- Department
- Qualifications
- Required Documents

Closed vacancies are unavailable for new applications.

Figure 3.2 Hiring Decision Module

[Insert screenshot of Hiring Decision Form]

Only HR Managers or Administrators can:

- Accept applicants
- Reject applicants
- Place applications on hold

Required fields:

- Final Decision
- Final Remarks

All decisions are recorded in the application history.

Figure 3.3 Maintenance Module

[Insert screenshot of Maintenance Module]

Administrators manage system reference data, including:

- Departments
- Positions
- Employment Types
- Requirement Types
- Interview Types
- Assessment Types

Figure 3.4 User and Role Management

[Insert screenshot of User Management Module]

Administrators can:

- Create HR accounts
- Activate or deactivate users
- Assign roles
- Reset passwords

C.2.4 REPORTS MODULE

Figure 4.1 Recruitment Reports

[Insert screenshot of Reports Dashboard]

The system generates the following reports:

- Applicant List Report
- Pending Applications Report
- Interview Schedule Report
- Accepted Applicants Report
- Rejected Applicants Report
- Missing Requirements Report

Reports may be printed or exported.

C.2.5 DATABASE MANAGEMENT

The system maintains records for the following database tables:

- Users
- Roles
- ApplicantAccounts
- Applicants
- Departments
- JobVacancies
- Applications
- RequirementTypes
- ApplicantDocuments
- ScreeningResults
- InterviewSchedules
- InterviewEvaluations
- HiringDecisions
- ApplicationStatusHistory
- AuditTrail

All system transactions are stored automatically.

D. BUSINESS RULES

The system follows these rules:

1. Applicants must register before submitting applications.
2. Duplicate applications for the same job are prohibited.
3. Closed job vacancies cannot receive applications.
4. Applicants can only access their own records.
5. Submitted applications become locked once HR review begins.
6. Only HR Managers or Administrators can accept applicants.
7. All status changes are recorded in the status history.
8. Missing requirements are visible to both applicants and HR users.
9. Submitted applications cannot be deleted.

E. APPLICATION STATUS FLOW

Status	Description	Editing Allowed
Draft	Application created but not submitted	Yes
Submitted	Application submitted	Yes
Under Review	HR has started review	No
Shortlisted	Applicant passed screening	No
For Interview	Interview scheduled	No
For Assessment	Applicant requires assessment	No
For Final Review	Awaiting final decision	No
Accepted	Applicant hired	No

Rejected	Applicant not selected	No
Withdrawn	Application cancelled	No

F. ROLES AND RESPONSIBILITIES

The members involved in developing the HR Applicant Process Window System were assigned specific roles and responsibilities to ensure the successful completion of the project.

Collaborative Responsibility: UI/UX Design

The user interface and user experience design of the system were developed collaboratively by all team members.

Shared Responsibilities:

- Brainstorming interface layouts and navigation flow.
- Designing forms, dashboards, and system screens.
- Ensuring consistency in colors, typography, and visual elements.
- Improving user experience through feedback and testing.
- Maintaining an intuitive and user-friendly interface for both applicants and HR personnel.

Team Leader / Main Developer

The Team Leader serves as the primary developer and oversees the technical direction and overall progress of the project.

Responsibilities:

- Leads the development of the system architecture and core functionalities.
- Assigns development tasks and monitors project milestones.
- Coordinates communication among team members.
- Oversees database design and system integration.
- Reviews code quality and ensures adherence to project requirements.
- Implements major modules and critical system features.

- Resolves technical issues encountered during development.

Documentation Specialist

The Documentation Specialist is responsible for preparing and maintaining all project-related documents.

Responsibilities:

- Creates and updates the user manual and technical documentation.
- Records system requirements, workflows, and development processes.
- Organizes project files and supporting materials.
- Documents testing results, revisions, and project updates.
- Ensures that all documents are accurate, clear, and complete.

Quality Assurance (QA)

The Quality Assurance member ensures that the system functions correctly and meets quality standards.

Responsibilities:

- Conducts functional, integration, and usability testing.
- Identifies bugs, errors, and system defects.
- Verifies that all requirements are implemented correctly.
- Validates business rules and application workflows.
- Documents test cases, test results, and reported issues.
- Confirms that defects are resolved before deployment.

Assistant Developer

The Assistant Developer supports the development and maintenance of the system.

Responsibilities:

- Assists in developing system modules and features.
- Supports database implementation and maintenance.
- Helps implement user interface functionalities.
- Fixes bugs and assists in system improvements.
- Collaborates with the Team Leader during development and testing phases.

- Provides technical support during integration and deployment.
